

## Housing Magnet

The picture on the right, is a picture of the Housing Magnet. Housing Magnet is a place holder or magnets home that used to filter the seeds (grains) plastic that will go into plastic injection machine.

Seeds (grains) plastic out of the hopper will first pass through the magnet housing before entering into the nozzle and injected into the mold.

The magnet housing is made of steel plate connected by means of welded. Then used a special material of acrylic.

We can fulfilled our customer expectation with the good quality with on time delivery.
